

THERMAL COVERS & BLANKETS

"Customized
Thermal Insulated Solutions,
We Manufacture & Deliver"

MADE IN CHINA

Why Insul-Pack Pallet Covers?

- High quality Covers provide maximum strength and protection to ensure your goods arrive in tip top condition
- Validated thermal performance
- Easy to use and suitable for reuse again and again
- Space saving and cost effective
- We have blankets of 10+ different materials. Custom sizing available
- Made in China and manufactured under an ISO Quality, Safety and Environmental Management System

STANDARD PALLET SIZES

EU Pallet	1200mm*1000mm 1200mm*800mm
US Pallet	1219mm*1016mm
JP, KR and Other Countries	1100mm*1100mm
We customize the size as per client's requirement	

Dual Locking System

Velcro / Tape Lock

Reuse System

APPLICATIONS

Perishable and Frozen Foods

Beer/Drinks and Dry Ice

Industrial Chemicals and Paints

Medical products

High Tech and Electrical

Ice cream and dairy

Bakery

Catering/Vending

Freezer

**Grades we Design

BP501 BP601 XPE501 XPE601 YF005-C YF005-D
RB501 RB601 EPE01 FP001 PE01 PE02

Alu Bubble Features: 96% reflectivity provides optimum warmth. Free from moisture and control condensation. Gloss barrier moisture protection. Single bubble provides effective insulation and break resistance.

BP501

SPERCIFICATIONS

Parameter	97% Reflectivity, 3% Emissivity
Material	5 Sides Pure Alu+Bubble Clear or Black +(Pure Alu)
Insulation	Insulation Similar to 45 MM Standard EPS
Weight	132 or 230 g/m ²
Thickness	4 MM

APPLICATIONS

Safety Temperature Range **2-8°C** or **15-25°C**

Reusable & Affordable

Less Than **50%** Product Mass

BP601

SPERCIFICATIONS

Parameter	97% Reflectivity, 3% Emissivity
Material	6 Sides Pure Alu+Bubble Clear or Black +(Pure Alu)
Weight	132 or 230 g/m ²
Thickness	4 MM

APPLICATIONS

Safety Temperature Range **2-8°C** or **15-25°C**

Reusable & Affordable

Less Than **50%** Product Mass

90% Moisture-proof

Alu XPE Properties: One layer closed-cell foam bonded between two layers of highly reflective metalized aluminum polyester film. Industrialized strength, lightweight yet durable insulation designed to hold staples without tearing. Does not compress, collapse or disintegrate. Reflects 97% of radiant heat, emits less than 3% of heat.

XPE501

SPERCIFICATIONS

Parameter	97% Reflectivity, 3% Emissivity
Material	5 Sides Pure Alu+Black XPE Foam+Pure Alu
Insulation	More Durable than BP601
Thickness	5 MM
Weight	265 g/m ²

APPLICATIONS

Safety Temperature Range 2-8°C or 15-25°C
Reusable & Affordable
Less Than 50% Product Mass
A1 Fireproof

XPE601

SPERCIFICATIONS

Parameter	97% Reflectivity, 3% Emissivity
Material	Material: 6 Sides Pure Alu+Black XPE Foam+Pure Alu
Insulation	More Durable than BP601
Thickness	5 MM
Weight	265 g/m ²

APPLICATIONS

Safety Temperature Range 2-8°C or 15-25°C
Reusable & Affordable
Less Than 50% Product Mass
90% Moisture-proof
A1 Fireproof

Material Features: Woven foil is the solution for applications requiring rough handling, puncture and tear resistance. Available both single-sided and double-sided with aluminium foil and/or aluminium film. Matt-Foil is a truly adaptable solution with self-supporting properties due to its high tensile strength.

YF005-C

SPERCIFICATIONS

Parameter	97% Reflectivity, 2.5% Emissivity
Material	6 Sides Reflective YF005-C Woven
Thickness	0.5 MM
Weight	155 g/m ²

APPLICATIONS

Safety Temperature Range **2-20°C** or **15-30°C**

Reusable & Portable

Less Than **50%** Product Mass

YF005-D

SPERCIFICATIONS

Parameter	97% Reflectivity, 2.5% Emissivity
Material	6 Sides Reflective YF005-D Woven
Thickness	0.5 MM
Weight	155 g/m ²

APPLICATIONS

Safety Temperature Range **2-20°C** or **15-30°C**

Reusable & Portable

Less Than **50%** Product Mass

Radiant Barrier Properties: Radiant barriers consist of a highly reflective material, radiant barrier is fiber-reinforced to increase durability and ease of handling. The thickness is double-sided approximately 6.5 mils in thickness (6.5 thousandths of an inch / .0065 inches), reflects (blocks) 97% of the radiant heat

RB501

SPERCIFICATIONS

Parameter	97% Reflectivity, 3% Emissivity
Material	5 Sides Alu+Woven+Alu
Thickness	135 μm
Weight	140 g/m ²

APPLICATIONS

Safety Temperature Range 2-8°C or 15-25°C
Reusable & Portable
Less Than 50% Product Mass
50% Moisture-proof

RB601

SPERCIFICATIONS

Parameter	97% Reflectivity, 3% Emissivity
Material	6 Sides Alu+Woven+Alu
Thickness	135 μm
Weight	140 g/m ²

APPLICATIONS

Safety Temperature Range 2-8°C or 15-25°C
Reusable & Portable
Less Than 50% Product Mass
100% Moisture-proof

EPE01

Alu EPE Features: Material Properties: One layer of closed-cell foam bonded between the two layers (1 layer of highly reflective metallized aluminum mylar and 1 layer of durable textured white vinyl surface). Industrial strength, lightweight and durable insulation designed to hold staples without tearing. Won't compress, fold or break. Reflects 97% of radiant heat and emits less than 3% of heat.

SPERCIFICATIONS	
Parameter	97% Reflectivity, 3% Emissivity
Material	Alu+EPE Foam+Alu
Thickness	3-8 MM
Weight	140 g/m ²
APPLICATIONS	
Safety Temperature Range -2-5°C or 15-25°C	
Reusable & Portable	
Less Than 30% Product Mass	
100% Moisture-proof	

FP001

Features: Thick and dense foam padding and high-quality pure aluminum film surface; fully enclosed with a magical adhesive closure, allowing for repeated use; providing 100% moisture and UV protection, ensuring temperature maintenance for pharmaceutical transportation for over 72 hours.

SPERCIFICATIONS	
Parameter	97% Reflectivity, 3% Emissivity
Material	6 Sides Reflective Alu Foil Flat
Thickness	15 MM
Weight	400 g/m ²
APPLICATIONS	
Safety Temperature Range <-1°C	
Most Preferable in Pharmaceutical Industry	
100% Moisture-proof	

PE Features: This PE wrap can be used to shield rain, dustproof, packed, this is made of high quality PE material, flexibility and eco-friendly.

PE01

SPERCIFICATIONS

Color	Clear
Material	PE Film
Thickness	0.02~0.15 MM
Height	120 CM, 150 CM, 200 CM, Customized

APPLICATIONS

Corrugated gaylords
Furniture
Bricks and blocks
Bags of aggregate
Sand
Other Irregularly shaped objects

PE02

SPERCIFICATIONS

Color	Black
Material	PE Film
Thickness	0.02~0.15 MM
Height	120 CM, 150 CM, 200 CM, Customized

APPLICATIONS

Corrugated gaylords
Furniture
Bricks and blocks
Bags of aggregate
Sand
Other Irregularly shaped objects

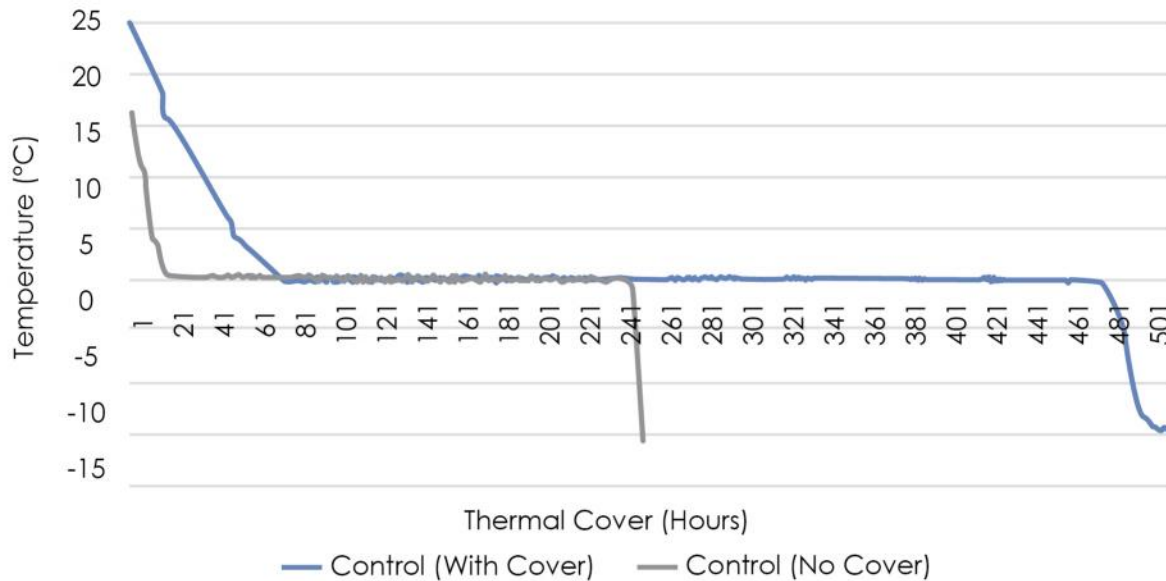

Performance

Our in-house testing proves consistency in thermal performance of our Pallet Covers. Not only will ThermoWeave protect your goods with it's superior strength, it will also maintain desired temperature over a set period of time.

Freeze Time Comparative Data

* Pallets are placed in a container freezer set to -25°C. Test ended when product reached -15°C

Thaw Time Comparative Data

* Frozen 500lt Pallecon filled with water with Pallet Covers on them, removed from freezer and placed in warehouse
